### LEAD AND COPPER (LCR) REVIEW SUMMARY SHEET

#### Requirements for Systems that *meet* the Action Levels

(90<sup>th</sup> percentile result was equal to or less than the Action Level)

The following is a review summary sheet for the results you submitted to the Department of Environmental Protection (MassDEP) for the compliance and monitoring period specified. This sheet is intended to help you remain in compliance with the LCR. To maintain compliance with the LCR you must take the specific action(s) checked (☒) below with their respective compliance dates. Please refer to the Drinking Water Regulations (310 CMR 22.00) for specific requirements relative to Lead and Copper and Consumer Confidence Report Rules.

Copper	1.3	0.078	no	30	0

#### ☒ **SCHOOL/CHILDCARE RESULTS for the period specified above:**

**School/ Sampling Results required by 310 CMR 22.06B(7)(a)9:** This is an additional requirement for community water supplies with every sampling round unless the school/childcare facility has its own well. These four diagnostic samples are in addition to the minimum number required and the results are not used in determining the 90<sup>th</sup> percentiles for lead and copper. These samples are used to educate the school/school district or facility on the importance of lead and copper sampling and the MassDEP Lead Contamination Control Program (LCCA) for schools and facilities. The results for two (2) sampling sites (kitchen and drinking water source, such as a water fountain) for each of two schools/ facilities are summarized in the table below:

School/Childcare Sampling Location	Lead (mg/l)	> AL?	Copper (mg/l)	> AL?

# Lead and Copper - 90<sup>th</sup> PERCENTILE COMPLIANCE Report

(For Systems Required to Collect More Than 5 Samples)

## I. PWS INFORMATION: Please refer to your DEP Lead &amp; Copper sampling plan for approved sampling locations.

PWS ID #: 4446000 City / Town: Weymouth  
 PWS Name: Weymouth Water Department PWS Class: COM ☒ NTNC ☐

Sampling Frequency: (choose one)  
☐ FIRST SEMI-ANNUAL SAMPLING PERIOD ☒ REDUCED - EVERY THREE YEARS  
☐ SECOND SEMI-ANNUAL SAMPLING PERIOD ☐ LEAD SERVICE LINE (LSL) REPLACEMENT PROGRAM  
☐ REDUCED - ANNUAL ☐ DEMONSTRATION

Step 1: Place lead results in ascending order (from lowest to highest value) with lowest value at # 1, in the table below. Repeat for copper results. Please report results that are ND or less than (<) the laboratory's reported detection limit (MDL) as zero. Results at or above the laboratory's detection limit (MDL) but below 0.005 mg/L for lead or 0.05 mg/L for copper shall be reported as measured or may be reported as 0.0025 mg/L for lead or 0.025 mg/L for copper.

Step 2: Multiply the total number of samples collected by 0.9 (this is your 90<sup>th</sup> percentile sample number). Round to the nearest whole number, if necessary.

Step 3: Compare the sample result at the 90<sup>th</sup> percentile sample number against the corresponding action level. If the 90<sup>th</sup> percentile value is higher than the action level, then you have an exceedance and are required to contact MassDEP as soon as possible for information on compliance actions.

Note: Do not include school results on this form unless the PWS is a school.
